Project StORe (Source-to-Output Repositories) Report for Biosciences

Version 3

- Page 5, List of Figures:
Figure 20: Type of source data produced by GenBank users
- Page 17
The names of preferred repositories, as stated in interviews and questionnaire, might benefit from some clarification. It is possible that for interviewees, a submission to the unspecific 'Internet' (3 answers) could include one of the named questionnaire 'online access repositories' and that submission to 'EBI' (2 answers) includes UniProt¹ (1 answer). Only one interviewee stated GenBank as source repository of choice.

¹The EBI protein database is a part of UniProt.

- Page 46:

Table 31: Output repositories support

Support	Documentary	Personal	Repository	No support
Questionnaire	6	2	6	18
Interviews	1			5
<i>Total count</i>	<i>7</i>	<i>2</i>	<i>6</i>	<i>23</i>

Σ= 38, question not answered by 14 respondents/interviewees

As percentage of support received:

Support	Documentary	Personal	Repository	No support
Questionnaire	11.5%	4%	11.5%	35%
Interviews	2%			10%
<i>Total percentage</i>	<i>13.5%</i>	<i>4%</i>	<i>11.5%</i>	<i>45%</i>

Σ= 74%, question not answered by 26% of the respondents/interviewees

The support options were:

Documentary support

Personal support provided by an intermediary

Repository-enabled support

No support is provided
