Dear «Title» «Lastname»,

Risk Analysis in Major Projects

For my Doctoral Thesis I am carrying out research into the **use** of **Risk** Analysis in Major Projects. In this research I wish to assess the extent to which risk analysis is currently being **used**, and I would welcome your co-operation.

Your company is one of the top construction companies listed in Jordons, 'Britains Top Construction Companies'. Jordan & Sons Ltd., Bristol, and I have therefore selected it for further examination with a questionnaire. I would like this questionnaire **to be completed by** up to six individuals in your company who are dealing with risk assessments in a variety of circumstances, such as design, installation management and finance.

I do appreciate that many demands are made on your time, and I would **be** grateful if I could *Speak* to you in the near future and obtain the names of your colleagues **who** would participate in this important piece of investigation.

Thanking you in advance.

Yours Faithfully,

Scott Baker,
BEng.

Risk Analysis in Major Projects

For my Doctoral Thesis I am carrying out research into the use of **Risk** Analysis in Major Projects. In this research I wish to assess the extent to which risk analysis is currently being used, and I would welcome your co-operation.

Your company is one of the more influential oil companies within the British *Oil* Industry, according to North Sea Oil and Gas Directory 1994/95, M-G Information Services Ltd. (1994). and I have therefore selected it for **further** examination with a questionnaire. I would like this questionnaire to be completed by up to **six** individuals in your company who are dealing with risk assessments in a variety of circumstances, such as design, installation management and finance.

I do appreciate that many demands are made on your time, and I would be grateful if I could **speak** to you in the near future and obtain the names of your colleagues who would participate in this important piece of investigation.

Thanking you in advance.
