Catalogue Of Core Glass Vessel Fragments And Manufacturing Debris From Amarna And Gurob

The Definition Of Terms Used In The Catalogue

Vessel Classes

Nolte's (Glas.) system of classification is used to describe the vessels' morphology.

I - Flasks

II - Jugs

III - Amphoriskoi

IV - Krateriskoi

V - Beakers

VI - Spherical Flasks

VII - Lentoid Flasks

VIII - Pomegranate Vessels

IX - Lotus Beakers

X - Kohl Palm Tubes

XI - Single Forms

Measurements

All measurements are in millimetres.

Length and width are maximum measurements.

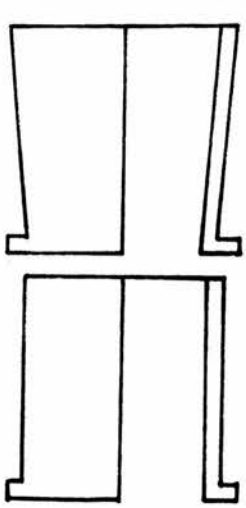
Thickness is the measurement of the vessel wall, except

on base fragments where it is the thickness of the base.

Colour

Nolte (Glasgefasse) has defined the description of colour for Egyptian glass, and her usage is followed in the catalogue.
Where possible the opacity of a colour is given: where a series of colours is given describing decoration the preceding adjective applies to them all.
Where opacity is not indicated it was not possible to determine.
e.g. opaque dark blue, yellow and white decoration: all colours are opaque.
dark blue, yellow and white decoration: the opacity is not determined.

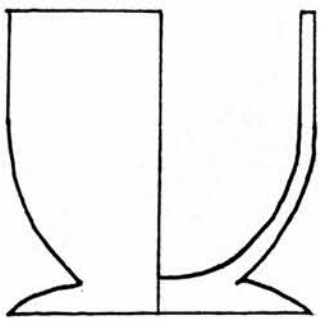
Forms Of Neck



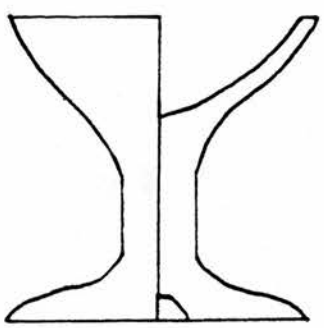
Conical - the neck has a tapering profile from the mouth.

Cylindrical - the neck has parallel vertical sides.

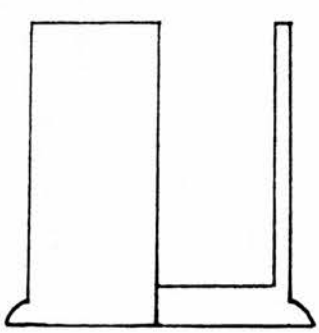
Forms Of Base



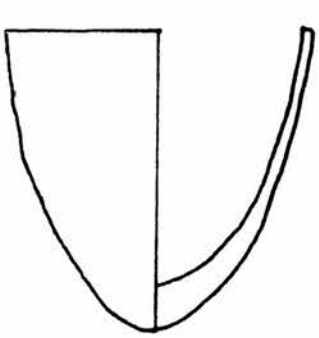
Button base - the body of the vessel joins directly on to the base. The base is flat and often has a rounded edge.



Pedestal base - this form has a conical foot and a pedestal to the body.



Footed base - this form is merely the flattened end of the vessel, often with a slight projecting edge as shown.



Apodal - a rounded base.

Descriptive Terms Used For The Manufacturing Debris

Blocks - regularly shaped (roughly cuboid).

Angular Flake - thick chips of glass with a triangular section.

Flat Flake - thin chips of glass.

Pincer Fragment - extended strips of glass with a round, flattened
end where pincers have been applied.

Blob - irregular piece of glass often with a very rounded appearance.

Rod - circular or semi-circular section strip of glass.

Cane - flattened rectangular plan strip of glass.
